

ID FINANCE

GHG DECLARATION

ID FINANCE is a fintech company that develops accessible, responsible, and transparent digital financial services with the aim of improving and facilitating the way end consumers manage their finances.

Due to the interest in minimizing the impact of its activity on the environment and reversing climate change, ID FINANCE commits to quantifying and reporting the emissions and removals of greenhouse gases generated in compliance with international standards ISO 14064-1:2018, adhering to the following principles for calculating the carbon footprint:

- Consistency
- Accuracy
- Relevance
- Integrity
- Transparency

Furthermore, it commits to fulfilling the following actions:

- Comply with applicable legislation related to climate commitment.
- Establish measures to reduce the carbon footprint.
- Express commitment to reduce GHG emissions.
- Motivate and encourage involved individuals to reduce emissions.
- Ensure the proper condition of facilities and equipment to align with the activity objectives and goals related to the reduction of greenhouse gas emissions.
- Guarantee continuous analysis of all relevant processes, establishing pertinent improvements in each case based on the results obtained and the objectives set in terms of climate change.

Management assumes the principles and actions with the necessary resources and provides staff with sufficient resources for their compliance, expressed and made publicly available through this carbon footprint declaration.
