

**Report on Limited Review**

**ID Finance Spain, S.A. (Sociedad Unipersonal)  
Interim Financial Statements  
for the 6-month period ended  
June 30, 2023**

## REPORT ON LIMITED REVIEW OF INTERIM FINANCIAL STATEMENTS

To the Sole Shareholder of ID Finance Spain, S.A. (Sociedad Unipersonal)

### *Introduction*

We have carried out a limited review of the accompanying interim financial statements of ID Finance Spain, S.A. (Sociedad Unipersonal), which consists of the balance sheet as at June 30, 2023, the income statement, the statement of changes in equity, the cash flow statement and the explanatory notes thereto for the 6-month period then ended. The Sole Director is responsible for the preparation of the Company's interim financial statements in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU), and for such internal control as he determines is necessary to enable the preparation of interim financial statements that are free from material misstatement, whether due to fraud or error. Our responsibility is to express a conclusion on said interim financial statements based on our limited review.

### *Scope of the review*

We conducted our limited review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A limited review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A limited review is substantially less in scope than an audit conducted in accordance with prevailing audit regulations in Spain and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the accompanying interim financial statements.

### *Conclusion*

As a result of our limited review, which under no circumstances should be considered an audit of financial statements, nothing came to our attention that would lead us to conclude that the accompanying interim financial statements do not express, in all material respects, a true and fair view of the financial position of ID Finance Spain, S.A. (Sociedad Unipersonal) at June 30, 2023, as well as its results and cash flow for the 6-month period then ended, in conformity with International Financial Reporting as adopted by the European Union (IFRS-EU).

*Restriction on distribution and use*

This report has been prepared at the request of Sole Director exclusively for the purpose of raising funds in financing rounds and, accordingly, it should not be used by third parties or for any other purpose without our prior written consent.

We will not accept any responsibility from any third parties different to the addressees of this report.

# ID FINANCE

IDFINANCE SPAIN S.A. (Sociedad Unipersonal)

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

## 1. GENERAL INFORMATION

IDFinance Spain, S.A. (Sociedad Unipersonal) (hereinafter referred to as the "Company") was established on February 26, 2015 as a sole shareholder limited company. On August 18, 2020, the Company changed its denomination to a sole shareholder public company. Its registered office is on Carrer Moià No. 1, 1<sup>st</sup> floor (08006) Barcelona, Spain. The Company CIF number is A66487190. Its registered office was included in the commercial register in Barcelona on March 23, 2015 in volume 44.735, folio 28, and sheet B 464824, inscription 1.

The main purpose of the Company is to exercise and exploit the following activities:

- Granting of non-mortgage loans or credits to any person, excluding in any case, the activities reserved to credit institutions in accordance with the applicable regulations.
- Advertising, consultancy and providing services in relation to the Internet, as well as placing ads on any other traditional or new media.
- Provision of online digital comparison services for financial products and instruments.

The Company is a leading digital finance provider in Spain.

The Company belongs to a Group of companies under the terms of Article 42 of the Commercial Code, the parent of which is IDFinance Investments, S.L. with registered office at Carrer Moià 1, 1<sup>a</sup> planta, 08006 Barcelona. As of 30 June 2023, the scope of the Group encompassed 10 subsidiaries. These companies engage in a range of activities, including among others, credit scoring and digital consumer finance provider.

ID Finance is a data-driven financing platform that is pioneering fintech innovation in emerging markets with a range of convenient, competitive, and transparent finance services available over the internet. The Company uses machine learning and advanced data science techniques to improve access to competitive financial services.

In 2019, the Parent Company of IDFinance Spain, S.L. closed a 5.4 million euros equity crowdfunding round. In 2021, it closed a second round with a total amount of 3.4 million euros.

In March 2023, ID Finance ranked as the fastest growing fintech in Spain for 2020 by Financial Times for the sixth consecutive year (2017-2022).

The Group prepares consolidated financial statements in accordance with IFRS-EU, whilst each component prepares separate statutory financial statements subject to the regulation in place in each jurisdiction in which they operate.

## 2. BASIS OF PRESENTATION AND ACCOUNTING STANDARDS

### (a) Basis of presentation and purpose of these financial statements

These financial statements have been prepared in accordance with international Financial Reporting Standards as adopted by the European Union (IFRS-EU), so that they give a true and fair view, in all material respects, of the equity and financial position of the Company as of June 30 2023, and the results of its operations and cash flows for the six-month period then ended, in conformity with the aforementioned applicable regulatory framework for financial information and, specifically, the accounting principles and criteria contained therein.

These IFRS financial statements have been prepared from the accounting records kept by the Company. However, given that the accounting principles and measurement criteria applied in the preparation of the financial statements may differ if using local accounting local requirements, the necessary adjustments and reclassifications have been made during the preparation of the financial statements to adapt them to the IFRS-EU principles.

The functional currency of the Company is Euro. All values are rounded to the nearest thousand (€'000), except when otherwise indicated.

The accounting policies used in the preparation of these special purpose financial statements meet every prevailing standard at the date they were authorized for issue. The International Financial Reporting Standards as adopted by the European Union establish application alternatives in some cases. The options applied by the Company are described in the several accounting policies detailed in these Notes.

**(b) Basis of measurement**

The main accounting policies and measurement basis applied in preparing these interim financial statements are summarised in Note 3.

**(c) Comparative information**

The information included in the accompanying interim financial statements and the explanatory notes referring to 31 December 2022 and 30 June 2022 are presented solely and exclusively for the purpose of comparison with the information as of 30 June 2023.

**(d) Mandatory new standards, amendments, and interpretations for the years subsequent to the calendar year beginning 1 January 2023.**

The following amendments to the IFRS standards or their interpretations (hereinafter "IFRIC" or "interpretation") became effective in 2023:

***IFRS 17 Insurance contracts***

In May 2017, the IASB issued IFRS 17 Insurance Contracts, a new comprehensive accounting standard for insurance contracts that covers recognition, valuation, presentation, and breakdowns. Once in effect, IFRS 17 will replace IFRS 4 Insurance Contracts that was issued in 2005. The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and uniform for insurers. Unlike the requirements of IFRS 4, which are largely based on the application of local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of IFRS 17 is the general model, complemented by:

- A specific adaptation for contracts with direct participation characteristics (variable fee approach).
- A simplified approach (premium allocation approach) mainly for short-term contracts.

IFRS 17 is effective for periods beginning January 1, 2023 (considering the postponement of its entry into force), requiring comparative figures to be included. Early application is permitted, provided that the entity also applies IFRS 9 and IFRS 15 on the date on which it first applies IFRS 17.

These amendments had no effect in the preparation of these interim financial statements.

***Amendments to IAS 8 - Definition of accounting estimates***

In these amendments, the IASB has introduced a new definition of "accounting estimate", which clarifies the difference between changes in accounting estimates, changes in accounting policies and corrections of errors.

These amendments had no effect in the preparation of these interim financial statements.

***Amendments to IAS 1 and IFRS Practice Document No. 2 - Disclosure of Accounting Policies***

In these amendments, the IASB has included guidance and examples for applying the judgment in identifying which accounting policies are material. The amendments replace the criterion of disaggregating significant accounting policies with material accounting policies. It also provides guidance on how to apply the concept of material to decide which accounting policies are.

These amendments had no effect in the preparation of these interim financial statements.

***Amendments to IAS 12 - Deferred taxes relating to assets and liabilities arising from a single transaction***

These amendments mean that the initial recognition exemption does not apply to single transactions, which give rise to the same amount of deductible and taxable temporary differences.

These amendments had no effect in the preparation of these interim financial statements.

**(e) New mandatory standards, amendments, and interpretations applicable in the years subsequent to the calendar year beginning 1 January 2023 pending approval by the European Union.**

***Amendments to IAS 1 Presentation of financial statements: classification of financial liabilities as current or non-current***

# ID FINANCE

IDFINANCE SPAIN S.A. (Sociedad Unipersonal)

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

In January 2020 and October 2022, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to clarify the requirements to be applied in the classification of liabilities as current or non-current. In particular, these amendments clarify the following concepts:

- Right to defer settlement. If an entity's right to defer settlement depends on future covenants, the entity has the right to defer payment even if it does not default on those future covenants at the closing date.
- Expected deferrals. The classification of a liability is unchanged by the likelihood that the institution will exercise its right to defer payment for at least 12 months after the end of the financial year.
- Settlement by means of equity instruments. There is an exception to the requirements to settle liabilities through equity instruments that impacts the classification of liabilities.

These amendments are effective for periods beginning on or after 1 January 2024 and should be applied retroactively in accordance with IAS 8.

### ***Amendments to IFRS 16: Leasing liabilities on a sale with subsequent lease***

In September 2022, the IASB issued an amendment to IFRS 16 Leases to specify the requirements that a seller-lessee must use to quantify the lease liability arising from the subsequent sale and lease. This modification has the objective that the seller-lessee does not recognize any gain or loss related to the right of use that he retains.

This amendment applies retroactively to annual periods starting on or after January 1, 2024.

### ***Amendments to IAS 7 and IFRS 7: Supplier financing arrangements***

In May 2023, the IASB issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments; Information to be disclosed to clarify the characteristics of financing arrangements and introduce new breakdowns to help users of financial statements understand the effects of these arrangements on liabilities, cash flows and exposure to liquidity risk.

The amendments will take effect for annual periods starting on or after January 1, 2024.

### ***Amendments to IAS 12 International Tax Reform Second Pillar Model Rules***

In May 2023, the IASB issued its amendments to IAS 12 income tax due to the new tax rules of the Second Pillar of the OECD Inclusive Framework. These amendments introduce, provisionally, a mandatory temporary exemption for the accounting of deferred taxes that may arise from such legislation. This amendment also requires additional breakdowns to facilitate the understanding of exposure to such tax rules.

The amendments relating to the mandatory exemption take effect immediately, while the amendments to the breakdowns enter into force for the annual periods starting on or after 1 January 2023.

## **(f) Use of estimates and judgements**

The preparation of financial statements in accordance with IFRS-EU requires from management the exercise of judgement to make estimates and assumptions that influence the application of accounting principles and the reported amounts of assets, liabilities, income, and expenses. The estimates and underlying assumptions are based on historical experience and various other factors that are deemed to be reasonable based on knowledge available at that time. Actual results may deviate from such estimates.

The estimates and underlying assumptions are revised on a continuous basis. Revisions in accounting estimates are recognised in the period during which the estimate is revised, if the estimate affects only that period, or in the period of the revision and future periods, if the revision affects the present as well as future periods.

Information about significant areas of estimation, uncertainty, and critical judgement in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described below:

### ***Allowances for credit losses on loans and receivables***

Total allowances for impairment on loans and advances are assessed collectively. Collectively assessed impairment allowances cover credit losses inherent in portfolios of loans and advances with similar credit risk characteristics when there is objective evidence to suggest that they contain impaired financial assets, but the individual impaired items cannot yet be identified. Collectively assessed impairment allowances also cover credit losses for portfolios of defaulted loans which are defined as past due 90 days or more. In assessing the need for collective loss allowances, management considers factors such as probability of

default ("PD"), loss given default ("LGD"), portfolio size, delay concentration and economic factors. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. To assess collective impairment allowances, the loan portfolio is grouped based on delay days. The significant assumptions used in determining collective impairment losses for the loan portfolio include:

- Management assumes that the Company collects cash from defaulted loans up to 24 months after default.
- Management calculates probability of default ratios using historic transition matrices which analyses loan portfolio movements between the delinquency buckets over one-month periods. This analysis is undertaken on a bucket's basis, in which the average probability of default ratios of the last 365 days is recalculated. Management writes off trade receivables and loans due from customers, when they are past due more than 810 days, or earlier if deemed to be uncollectable.

### **Impairment of non-financial assets**

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs of disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the performance of the assets of the cash generation unit being tested. The recoverable amount is sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

There are no indicators of impairment of non-financial assets at 30 June 2023 and 31 December 2022. The most significant non-financial assets subject to potential impairment testing are owned property and equipment and intangible assets, which mainly represent internal software development costs capitalised.

### **Deferred tax assets and uncertain tax positions**

Income tax expense comprises current and deferred tax. Current tax is tax payable on taxable income for the year, using tax rates at reporting date and any adjustments to tax payable in respect of previous years.

Deferred tax assets for unused tax losses are recognised to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

## **3. SIGNIFICANT ACCOUNTING POLICIES**

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented in these financial statements, unless otherwise stated.

### **(a) Income and expense recognition**

Interest income (including commission, extension fee and penalty) from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

Interest income or expense is recognised using the effective interest method.

If the Company revises its estimates of payments or receipts, it adjusts the carrying amount of the loan to reflect actual and revised estimated cash flows. The Company then recalculates the carrying amount by computing the present value of estimated future cash flows at the financial instrument's original effective interest rate, and the adjustment to the carrying amount is recognised in income. When it receives loan extension fees, which represent prepaid interest for the requested period of extension, such amounts represent the increase in the carrying value of the loan and are recognised in income upon receipt.

Other fees, commissions, penalties and other income and expense items are recognised in profit or loss when the corresponding service is provided.

### **(b) Foreign currency translation**

# ID FINANCE

IDFINANCE SPAIN S.A. (Sociedad Unipersonal)

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

## **Functional and presentation currency**

Items included in the financial statements are measured in thousands of euros.

## **Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the reporting date exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss. Monetary assets and liabilities denominated in foreign currencies are premeasured into the functional currency at the rate of exchange ruling at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value is determined.

As at the reporting date, the assets and liabilities of the Company with functional currencies other than the presentation currency are translated into the presentation currency of the Company (EUR euros) at the rate as at the reporting date, the assets and liabilities of the Company with functional currencies other than the presentation currency are translated into the presentation currency of the Company (EUR euros) at the rate of exchange ruling at the reporting date and their operations are translated at exchange rates prevailing at the date of the transactions. The exchange differences arising on the translation are recognised in other comprehensive income.

## **(c) Income tax expense**

Income tax expense represents the sum of the tax currently payable and deferred tax and is recorded in the profit or loss.

Tax liabilities and assets for the current and prior periods are measured at the amount expected to be paid to or recovered from the taxation authorities, using the tax rates and laws that have been enacted, or substantively enacted, by the reporting date. Current tax includes any adjustments to tax payable in respect of previous periods.

Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted tax rates are used in the determination of deferred tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred taxes relate to the same fiscal authority.

## **(d) Cash and cash equivalents**

Cash and short-term deposits in the statement of financial position comprise cash at bank and short-term deposits with an original maturity of three months or less. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above.

## **(e) Financial instruments**

### **(i) Classification**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those that the Company:

- intends to sell immediately or in the near term;
- upon initial recognition designates as at fair value through profit or loss;
- upon initial recognition designates as available-for-sale or may not recover substantially all of its initial investment, other than because of credit deterioration.

Management determines the appropriate classification of financial instruments at the time of the initial recognition.

The Company classifies non-derivative financial assets into loans and receivables category, which consists of loans due from customers, cash and cash equivalents and other assets.

The Company classifies non-derivative financial liabilities into the other financial liabilities' category. Other financial liabilities comprise of loans from related party and other liabilities.

## **(ii) Recognition**

Financial assets and liabilities are recognised in the statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

## **(iii) Measurement**

A financial asset or liability is initially measured at its fair value plus, in the case of a financial asset or liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability.

Subsequent to initial recognition, loans and receivables and other financial liabilities are measured at amortised cost using the effective interest method.

## **(iv) Amortised cost**

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment. Premiums and discounts, including initial transaction costs, are included in the carrying amount of the related instrument and amortised based on the effective interest rate of the instrument.

## **(v) Fair value measurement principles**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal market, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Company measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

When there is no quoted price in an active market, the Company uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all the factors that market participants would consider in these circumstances.

The key financial instruments of the Company are cash, trade receivables, loans due from customers, loans to related parties, trade payables, loans payable and other creditors arising from the business activities.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price, i.e., the fair value of the consideration given or received. If the Company determines that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument, but no later than when the valuation is supported wholly by observable market data or the transaction is closed out.

In addition, for financial reporting purposes, the Company measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements:

- Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: inputs other than quotes prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

# ID FINANCE

IDFINANCE SPAIN S.A. (Sociedad Unipersonal)

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

## **(vi) Gains and losses on subsequent measurement**

For financial assets and liabilities carried at amortised cost, a gain or loss is recognised in profit or loss when the financial asset or liability is derecognised or impaired, and through the amortization process.

## **(vii) Derecognition**

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers substantially all the risks and rewards of ownership of the financial asset. Any rights created or retained by the Company is recognised as a separate asset or liability in the statement of financial position. The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

The Company also derecognises certain assets when it writes off balances pertaining to the assets deemed to be uncollectible.

## **(viii) Offsetting**

Financial assets and liabilities are offset, and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

## **(f) Provisions**

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Where the Company expects a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

## **(g) Impairment of financial assets**

The Company assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired. When objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows of the asset that can be estimated reliably.

In assessing collective impairment, the Company uses statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate. Specific impairment testing is not undertaken since the loan portfolio consists of a large number of small homogeneous exposure loans that would make individual impairment testing impractical.

Given the nature of the Company's financial assets, the Company considers that there has been a significant increase in credit risk that triggers stage 2 classification when there is already one day past due, and that there is evidence of impairment that triggers stage 3 classification when there are 90 days past due.

## **(h) Financial statements of foreign operations**

The assets and liabilities of foreign operations are translated to EUR euros at exchange rates at the reporting date. The income and expenses of foreign operations, excluding foreign operations in hyperinflationary economies, are translated to EUR euros at rates at the dates of the transactions. Foreign exchange differences arising on retranslation are recognised as a separate component of equity.

## (i) Financial assets carried at amortised cost

Financial assets carried at amortised cost consist principally of loans and other receivables. The Company reviews its loans and receivables to assess impairment on a regular basis. The Company first assesses whether objective evidence of impairment exists individually for loans and receivables that are individually significant, and individually or collectively for loans and receivables that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed loan or receivable, whether significant or not, it includes the loan or receivable in a group of loans and receivables with similar credit risk characteristics and collectively assesses them for impairment. Loans and receivables that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on a loan or receivable has been incurred, the amount of the loss is measured as the difference between the carrying amount of the loan or receivable and the present value of estimated future cash flows including amounts recoverable from guarantees and collateral discounted at the loan or receivable's original effective interest rate. Contractual cash flows and historical loss experience adjusted on the basis of relevant observable data that reflect current economic conditions provide the basis for estimating expected cash flows.

In some cases, the observable data required to estimate the amount of an impairment loss on a loan or receivable may be limited or no longer fully relevant to current circumstances. This may be the case when a borrower is in financial difficulties and there is little available historical data related to similar borrowers. In such cases, the Company uses its experience and judgment to estimate the amount of any impairment loss.

All impairment losses in respect of loans and receivables are recognised in profit or loss and are only reversed if a subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised.

When a loan is uncollectable, it is written off against the related allowance for loan impairment. The Company writes off a loan balance (and any related allowances for loan losses) when management determines that the loans are uncollectable and when all necessary steps to collect the loan are completed.

## (j) Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

### *Company as a lessee*

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

### Right-of-use asset

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

### Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

## (k) Non-financial assets

Other non-financial assets, other than deferred taxes, are assessed at each reporting date for any indications of impairment. The recoverable amount of goodwill is estimated at each reporting date. The recoverable amount of non-financial assets is the greater of their fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the

recoverable amount is determined for the cash-generating unit to which the asset belongs. An impairment loss is recognised when the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

All impairment losses in respect of non-financial assets are recognised in profit or loss and reversed only if there has been a change in the estimates used to determine the recoverable amount. Any impairment loss reversed is only reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

## **(l) Property and equipment**

### **(i) Owned assets**

Items of property and equipment are stated at acquisition cost less accumulated depreciation and impairment losses. Where an item of property and equipment comprises, major components having different useful lives, they are accounted for as separate items of property and equipment.

### **(ii) Depreciation**

Depreciation is charged in profit or loss on a straight-line basis over the estimated useful lives of the individual assets. Depreciation commences on the date of acquisition or, in respect of internally constructed assets, from the time an asset is completed and ready for use. Land is not depreciated. The estimated useful lives are as follows:

Computer equipment	3 years
Long-term leasehold improvements	5 years
Other property and equipment	5 years

At each year end, the Company reviews the residual value, useful life and depreciation method of property, plant, and equipment items. Any changes in the initial criteria are accounted for as a change to estimates.

### **(iii) Depreciation**

The Company evaluates and determines impairment losses on property, plant and equipment and any reversals thereof in accordance with the criteria described in Note 3 p).

## **(n) Intangible assets**

The Company has a detailed Intangible Assets Capitalisation Policy covering accounting for development projects. The Company incurs costs for development of computer software and similar items, which may be capitalised. Capitalised expenditure can be either external (for example, IT subcontractors) or generated internally within the entity (for example, IT employees developing IT software).

Only assets are capitalised that are separately identifiable, for which the entity has control, and for which probable future economic benefits shall be recognised. No intangible asset costs arising from the research phase of a project are capitalised. Expenditure on research is expensed when incurred. Amortisation commences once the item is in the location and conditions necessary for it to be capable of operating in the manner intended by management and has been accepted by the business owner. Intangible assets, other than goodwill, are stated at cost less accumulated amortization and impairment losses. Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Amortization is charged in profit or loss on a straight-line basis over the estimated useful lives of intangible assets.

The estimated useful lives are as follows:

Licenses, trademarks, and similar rights	5 years
Software and other intangible assets	3 years

## **(o) Borrowing costs**

Borrowing costs that are not directly attributable to the acquisition, production or creation of the qualifying assets are recognised in profit or loss using the effective interest method.

Borrowing costs are capitalised related to the creation, production of the new qualifying assets. Borrowing costs attributable to the creation of qualifying assets are capitalised as a portion of the qualifying asset's cost. A qualifying asset is an asset that takes a substantial period of time to get ready for its intended use or sale. For the Company, the capitalisation of borrowing costs is relating to intangibles is mainly relevant for capitalised expenditure for the development of new data IT systems.

## (p) Impairment of non-financial assets

Assets with an indefinite useful life are not amortised but tested annually for impairment. Assets that are amortised or depreciated are tested for impairment whenever events or changed circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised in the amount by which the carrying amount of an asset Exceeds its recoverable amount, which is the greater of the net selling price and value in use. In respect of items of property, plant and equipment and intangible assets, an impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

## (q) Share capital, Share Premium and other Shareholders contributions.

Share capital is classified as equity.

Share Premium - the difference between the par value of a company's shares and the total amount a company received for shares recently issued. The share premium can only be resorted to for limited purposes, which do not include the distribution of dividends, and is otherwise subject to the provisions of the Spain Companies Law on reduction of share capital.

Other shareholders contributions - Assets, liabilities and equity items received from equity holders or owners in their capacity as such and for transactions not recorded in other accounts, provided that these items do not constitute compensation for goods delivered or services rendered by the company and that they do not have the nature of a liability.

## (r) Dividends

The ability of the Company to declare and pay dividends is subject to the rules and regulations of Spain legislation.

Dividends in relation to share capital are reflected as an appropriation of retained earnings in the period when they are declared.

## (s) Short term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

## (t) Transactions with related parties

Transactions with related parties are accounted in accordance with the valuation rules detailed above, except for the following transactions:

- The non-monetary contributions of a business to a company are generally measured at the book value of the equity items delivered in the financial statements at the date the transaction is carried out.
- In the merger and split operations of a business, the acquired elements are generally valued at the amount corresponding to them, once the transaction has been completed, in the financial statements. Differences that arise are registered in reserves.

## 4. INTEREST AND RELATED INCOME

'000	30-Jun-2023	30-Jun-2022
Interest on loans due from Customers	29,628	29,938

## 11. LOANS AND BORROWINGS

This note provides information about the contractual terms of the Company interest-bearing loans and borrowings, which are measured at amortised cost.

	30-Jun-23	31-Dec-22
Loans from private investors	20,651	22,713
Bonds Issued	31,788	29,822
<b>Loans and borrowings</b>	<b>52,439</b>	<b>52,535</b>
Maturing within one year	20,651	22,691
Maturing after one year	31,788	29,844
<b>Loans and borrowings</b>	<b>52,439</b>	<b>52,535</b>

On September 25, 2020, the Company issued a bond for a nominal amount of 40,000 thousand euros. The bond has an annual coupon of 9.5%, matures in 2023 and it is listed on the open market of the Frankfurt Stock Exchange.

On November 3, 2022, the maturity of the loan was extended from September 2023 to September 2025.

As of June 30, 2023, the amount of bonds subscribed was 32,527 thousand euros with an adjusted valuation of 31,788 thousand euros (29,822 thousand euros as of December 31, 2022) from which 1,963 thousand euros were issued in 2023 (600 thousand euros in 2022).

Detailed breakdowns of loans and borrowing maturities are presented in Note 16.

The fair value of total Loans and Borrowings on 30 June 2023 and 31 December 2022 does not differ significantly from that recognised under “Loans and Borrowings” in the accompanying balance sheet and is classified as level 2.

## 12. OTHER FINANCIAL ASSETS AND LIABILITIES

'000	30-Jun-23	31-Dec-22
Receivables related parties (Note 17)	990	344
Other financial assets	1,575	1,279
<b>Total other financial assets</b>	<b>2,565</b>	<b>1,623</b>

'000	30-Jun-23	31-Dec-22

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

## 13. INCOME TAX

The Company files a consolidated income tax return with the tax group of which IDFinance Investments, S.L. is the parent.

Under prevailing tax regulations, tax returns may not be considered final until they have either been inspected by the tax authorities or until the four-year inspection period has expired. The Company is open to inspection for all taxes to which it is liable for the last four years. The Company's Sole Director and tax advisors consider that, in the event of a tax inspection, no significant tax contingencies would arise as a result of varying interpretations of the tax legislation applicable to the Company's transactions.

### (a) Income tax expense

'000	30-Jun-23	30-Jun-22
Current income taxes	1,357	2,039
Deferred taxes	86	(363)
<b>Total income tax (gain)/expense</b>	<b>1,443</b>	<b>1,676</b>

The tax rate in Spain is 25%.

### (b) Reconciliation of taxation based of taxable profit and taxation based on accounting profit:

'000	30-Jun-23	30-Jun-22
<b>Profit/(loss) before tax</b>	<b>5,802</b>	<b>6,703</b>
Income tax at the prevailing tax rate	1,450	1,675
Non-deductible costs (non-taxable income)	(7)	1
Change in unrecognised deferred tax assets		
<b>Total income tax gain/(expense)</b>	<b>1,443</b>	<b>1,676</b>

### (c) Deferred tax assets

'000	Balance 1 January 2023	Recognised in profit or loss	Balance 30 June 2023
Loans to customers – loan loss allowance	9,193	(548)	8,645
Others	269	462	731
<b>Total Deferred tax assets</b>	<b>9,462</b>	<b>(86)</b>	<b>9,376</b>

'000	Balance 1 January 2022	Recognised in profit or loss	Balance 31 December 2022
Loans to customers – loan loss allowance	8,623	570	9,193
Others	683	(414)	269
<b>Total Deferred tax assets</b>	<b>9,306</b>	<b>156</b>	<b>9,462</b>

The Company expects to recover the Deferred tax assets of the balance sheet by using them in the income tax calculation within the next 5 years.

IDFINANCE SPAIN S.A. (Sociedad Unipersonal)

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

## 14. SHARE CAPITAL AND RESERVES

### (a) Issued capital

On April 1, 2015, the Company's share capital consisted of 3,006 shares with a value of 1 euro each. The shares were fully subscribed and paid.

As of December 13, 2017, the Company approved a capital increase through the issuance of 56,994 shares with a value of 1 euro each. As a result of this increase, the share capital was increased to 60,000 shares.

As of June 30, 2023 and December 31, 2022, capital consists in 60,000 shares of 1 euro of nominal value each, fully subscribed and disbursed by the Company's sole shareholder.

### (b) Other shareholders contributions

As of December 19, 2019, the Company's Sole Shareholder approved a cash contribution into the equity of IDF Spain of 3,000 thousand euros, which were disbursed on December 20, 2019.

### (c) Reserves and retained earnings

#### Legal Reserve

According to the Law on Capital Companies, the legal reserve, as long as it does not exceed the limit of 20% of the share capital, is not distributable to shareholders and may only be allocated, in the case of no other reserves available to the compensation of Losses. This reserve may also be used to increase share capital in the amount exceeding 10% of the capital already increased. This legal reserve amounts to 12 thousand euros as of June 30, 2023.

### (d) Dividends

Dividends payables are restricted to the maximum retained earnings of the Company, which are determined according to Spain legislation.

During 2022, the Company's Shareholder approved the distribution of a dividend of 5,268 thousand euros.

As of May 31, 2023, the company's Sole Shareholder approved the distribution of a dividend of 1,500 thousand euros.

## 15. PROVISIONS AND CONTINGENCIES

The following table provides a detail of changes in provisions for contingencies:

'000	30-Jun-23	31-Dec-22
Opening balance	1,893	1,216
Provision allowance	3,584	2,911
Utilization	(2,526)	(2,234)
<b>Closing balance</b>	<b>2,951</b>	<b>1,893</b>

At 30 June 2023 and December 31, 2022, the Company has some contingencies with borrowers and several legal proceedings underway as a result of several lawsuits derived from its ordinary activity. Based on all available documentation at the end of the reporting period, the Company has recorded in June 2023 a provision amounting to 2,951 thousand euros (1,893 thousand euros in December 2022) to meet these contingencies. The company classifies provisions in the income statement depending on the nature of the risks covered.

## 16. FINANCIAL RISK MANAGEMENT

The Company has exposure to the following risks from its use of financial instruments and operating activities:

- a) Credit risk
- b) Liquidity risk

c) Market risk

- c1) Interest rate risk
- c2) Currency risk

d) Operational risk

**(a) Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises primarily from the Company loans from customers. Credit risk is mitigated as follows:

- Lending procedures are set up to ensure quality of the loan portfolio, such procedures are constantly improved and include judicial and behavioural indicators, statistical data mining and scoring models, and use of credit bureau data,
- Penalties and term extensions are used to mitigate risks associated with unpaid debts. These options are available to borrowers in cases where there is a difficulty or unwillingness to repay the debts, Penalties and extensions generate extra cash flows to the portfolio.
- Loan loss allowances are an adequate way to mitigate risk of losses to be incurred during loan repayment transactions.

**Maximum exposure of credit risk**

The Company maximum exposure to credit risk varies significantly and is dependent on both individual risks and general market economy risks.

The following table presents the maximum exposure to credit risk of financial assets. For financial assets in the statement of financial position, the maximum exposure is equal to the carrying amount of those assets:

'000	30-Jun-23	31-Dec-22
Cash and cash equivalents	6,067	3,292
Loans due from customers	51,159	47,531
Loans to related parties	13,836	16,345
Prepaid expenses and other financial assets	2,686	1,810
<b>Total financial assets</b>	<b>73,748</b>	<b>68,978</b>

**(b) Liquidity risk**

Liquidity risk refers to the availability of sufficient funds to meet borrowed funds withdrawals and other financial commitments associated with financial instruments as they actually fall due. The Head of Treasury controls these types of risks by means of maturity analysis, determining the Company strategy for the next financial period, Current liquidity is managed by the Head of Treasury as well, which deals with the markets for current liquidity support and cash flow optimization. The tables below set out the remaining contractual maturities of the Company financial liabilities and financial assets. In order to manage liquidity risk, as part of the assets/liability's management process, the Company's Head of Treasury performs daily monitoring of future expected cash flows from customers.

An analysis of the liquidity risk is presented in the following table:

## (c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk covers interest rate risk, currency risk and other pricing risks to which the Company is exposed. Market risk arises from open positions in interest rate and equity financial instruments, which are exposed to general and specific market movements and changes in the level of volatility of market prices and foreign currency rates.

The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

The Company's Head of Treasury conducts monitoring of the Company's current financial performance, estimates the Company's sensitivity to changes in interest rates and its influence on the Company's profitability.

### c1) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

The Head of Treasury manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings.

# ID FINANCE

IDFINANCE SPAIN S.A. (Sociedad Unipersonal)

NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2023

## c2) Currency risk

Currency risk is the risk of losses or other adverse effects resulting from a change in a foreign exchange rate, or from other unfavourable changes in relation to a foreign currency. The Company has assets and liabilities denominated in several foreign currencies and hence is exposed to Currency Risk.

Generally, borrowings are denominated in currencies that match the cash flows generated by the underlying operations of the Company. In addition, interest on borrowings is denominated in the currency of the borrowing. This provides a natural hedge without a need to enter into derivatives contracts.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Company strategy is to ensure that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot or forward rates when necessary to address short- and longer-term imbalances.

The Company's exposure to foreign currency exchange rate risk is presented in the table below:

'000	EUR denominated	MXN denominated	Total
<b>30-Jun-23</b>			
<b>Financial assets</b>			
Cash and cash equivalents	5,983	84	<b>6,067</b>

## d) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Company's processes, personnel, technology, and infrastructure, and from external factors other than credit, market, and liquidity risks, such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all the Company's operations.

The Company's credit policy defines lending guidelines according to its business strategy and efficient risk management, protecting assets as well as complying with local regulatory requirements. Potential or foreseeable changes in applicable laws are analysed on an ongoing basis and any necessary modifications to the Company operations are implemented proactively.

The Company's objective is to manage operational risk to balance the avoidance of financial losses and damage to the Company's reputation with overall cost effectiveness, and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit.

## 17. RELATED PARTY TRANSACTIONS

### (a) Transactions with Sole Director

There were no transactions of any kind with the Directors during the first half of 2023 and for the year 2022 besides the Labour contract entered between him and the company dated June 21, 2021.

### (b) Transactions with related parties

The related parties with whom the Company has carried out transactions during the first semester of 2023 and the year 2022, and the nature of such relationship, are as follows:

	Nature of relationship
IDFinance Investments, S.L.	Parent Company
IDF CAPITAL S.A.P.I. DE C.V., S.O.F.O.M., E.N.R.	Group company
Debt Management Partners, S.L.U.	Group company

Percentage representing the payments made which are inferior to the established regulation over the total payments made.	84%	83%
<b>(Number of invoices)</b>		
Invoices paid in a period shorter than the maximum established by regulation.	1118	756
Percentage over total invoices.	87%	79%

## 21. EVENTS AFTER REPORTING DATE

After 30 June 2023 and until the date of authorisation of these Interim financial statements, there were no subsequent events other than those explained in these notes.

# ID FINANCE

## IDFINANCE SPAIN S.A. (Sociedad Unipersonal) MANAGEMENT REPORT

### Main activity of the company

ID Finance Spain was created in 2015 in Barcelona and is part to the ID Finance Group, an online provider of financial services, the parent of which is IDFinance Investments, S.L.

The main activity of ID Finance Spain is to grant non-mortgage loans or credits to any person, excluding the activities reserved to financial institutions pursuant to applicable regulations.

The company is benefiting from the growth of the Internet in mobile phones and data availability to provide access to competitive and transparent financial services and address the massive structural demand that traditional operators are not meeting.

The company currently applies machine learning and artificial intelligence to all business areas, from customer review to the optimization of online marketing campaigns and the provision of efficient services to customers. Given our wide experience and an innovative approach to data collection and processing, we offer fast cash loans which are totally automated and readily available.

### Results for the period, business evolution and outlook

The company reported a first-half revenue of €59M, while net income reached €4.4M, following an 8% increase of its net portfolio which hit a new record of €51M. During the first half of the year, the company originated €121.1M consumer loans, processing on more than 70,000 applications per month.

In addition, the Company further solidified its financial stability with a strong equity position of 26%, representing a 2.6p.p. improvement from the previous year underscoring the company's commitment to prudent financial management and its ability to reinvest profits into growth initiatives. Combining growth and profitability highlights the strength of ID Finance marketing and risk management capabilities.

The strong capitalization and profitability levels achieved, exceeded with large headroom IDFinance Spain Eurobond covenants on equity/asset ratio (over 26% vs 15% required level) and interest coverage (over 3x vs 1.5x required level).

Temporary decrease in net profit margin is largely driven by higher funding cost (following market trends), as well as investments into the products with the aim to further improve client's quality in 2H2023.

Overall, the figures highlight the continued success of ID Finance Spain strategy, driven by innovation and risk management capabilities, which have proven effective in navigating economic complexities and delivering consistent results.

### Transactions with treasury shares

The Company has not carried out any transactions with treasury shares during the year.

### Main financial instruments and risk management

The financial instruments key to the company are balances in bank accounts, trade receivables, loans to customers, trade payables, payable loans and other payables arisen from trade transactions.

The Company is exposed to the following risks related to the use of financial instruments and operating activities:

- a) Credit risk
- b) Liquidity risk
- c) Market risk
  - c1) Interest rate risk
  - c2) Foreign currency risk
- d) Operational risk

a) Credit risk is the risk of a financial loss for the company if a customer or counterparty of a financial instrument does not meet its contractual obligations. This is a substantial risk mainly in loans to customers. Credit risk is mitigated as follows:

- The procedures for granting loans are established to ensure the quality of our customer portfolio. These procedures are constantly improved and include judicial and behavioural indications through the analysis of statistical data and rating models.
- Sanctions and extensions of loan repayment terms are used to mitigate the risks related to bad debts. These options are applied when borrowers are struggling or unwilling to pay the debt. Sanctions and extension generate additional cash flows in the portfolio.

b) Liquidity risk refers to the availability of enough funds to cover funds received, and other financial commitments when they mature. The cash department monitors these risks by analysing maturity and determining the company's strategy for future financial transactions, as well as the optimization of cash flows.

c) Market risk

c1) Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to market interest rates mainly relates to non-current payment obligations arranged at floating interest rates.

The Company manages interest rate risk by holding a balanced portfolio of loans at fixed and floating interest rates.

c2) Foreign currency risk is the risk of loss or other negative effects caused by fluctuations in exchange rates. The Company has liabilities (loans granted by ID Finance group companies) in foreign currency (USD) and is therefore exposed to foreign currency risk.

In general, loans are denominated in the same currency as the cash flows generated by the underlying transactions of the company. Additionally, loan interest is denominated in the loan currency. This provides a natural hedge, and no hedging derivatives need to be arranged.

d) Operational risk is the risk of direct or indirect loss as a result of a wide range of causes related to company processes, employee, technology and infrastructure, and external factors other than credit, market, and liquidity risks, such as those derived from legal risks, regulatory requirements or generally accepted corporate behaviour standards. Operational risks arise as a result of all company transactions.

The Company's credit policy defines the guidelines for granting loans in accordance with its commercial strategy an efficient risk management, protecting assets and complying with local regulatory requirements. Potential or foreseeable changes in applicable laws are continually analysed and any necessary modification in the company's transactions is proactively implemented.

Senior executives in each business unit are responsible for developing and implementing controls to address operational risk.

### **Human resources and environmental policy**

The Company is dedicated to bringing financial prosperity to its customers, employees, and shareholders. Responsible lending is at the core of ID Finance values. The Company carefully assesses customer's ability to pay and will not offer credit that they do not need or cannot afford. In addition to that, no aggressive credit policies or intrusive marketing techniques are used, and the Company caps interest and fees charged in case of default.

The average headcount of the Company in the first half of 2023 is 147 employees (2022 full year: 146 employees), of whom 53% are women and 46% are men, approximately.

The main values of the Group are as follows:

Diversity: support to inclusive culture

Transparency: profitability-oriented

Flexibility: prioritize positive working environment

The Company's recruitment and selection policy has been designed to recruit and select the most qualified and talented people. This policy aims to ensuring fair hiring and equal employment opportunity practices, excluding all type of discriminatory practices.

ID FINANCE  
ID FINANCE SPAIN S.A. (Sociedad Unipersonal)  
MANAGEMENT REPORT  
It should be noted that commitment to environmental protection and respect or efficient consumption of energy resources are a common denominator in the Company's activities and are part of our organization's culture and values.  
The Company's environmental impact has been assessed in the first half of 2023, identifying the amount of carbon emissions generated in a year. The management has proceeded to reduce and offset its carbon through different activities both internal and external hence becoming a carbon neutral company.  
**Research and development**  
The Company has wide experience in both IT systems and data analytics. The IT systems team constantly expand their experience in artificial intelligence and the data analytics team specialize in statistics, machine learning and related methods. The effective combination of both teams drives product innovation and positively transforms customer experience.
